Claims 33-36 and 43-44 are allowed.

The following is an examiner's statement of reasons for allowance: The prior art does not directly teach of an self service terminal comprising means for paying for *additional time* for an account of a telephone user. This is now reflected in the claim by a *means for receiving a request to credit service time*. As discussed in the specification and as amplified in the applicant's appeal brief, in this claimed invention, the self device terminal interface is limited to one to programmed to receive a request from a user to purchase additional telephone time to an account to which no bill exists. The examiner understands this to be what is known in the industry as a "prepaid" telephone account. The prior art fails to teach this means (i.e. a self service terminal comprising a processor programmed to display this interface).

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Michael Chan on August 09, 2006

Claims 32, 39-42 and 45 are canceled.

33. A self-service terminal for enabling a telephone user to purchase additional telephone service time for a telephone service account, the self-service terminal comprising:
